

IMPORTANT COVID19 Update PMG. It has been challenging for doctors and patients when COVID testing is unreliable, unavailable, and untimely for results. PMG has become a State of MI certified location. One of our doctors has served as a consultant (medical director level) nationally for municipalities and companies on COVID19 since March (> 150, 000 COVID19 patients) giving us expertise that few have. Our tests use a level 1 lab that runs the tests for us the night of collection, and as a preferred client, most tests are back in 24 hours—except when COVID19 is very hot in the region. Typically, a brief telemedicine visit will be scheduled along with the COVID19 test. Our COVID19 testing uses the low nose technique and is by appointment only as a drive-up, self-administered process. The total time averages less than 5 minutes. Our approach to COVID19 is truly state of the art. As patients of PMG, you need not consider urgent care clinics, random Teledoc, or other options for your respiratory symptoms during this COVID19 season--CALL US. PMG Management
